Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

Applicant's after-final amendment filed 7/23/03 amended claim 82 and added new claim 83. In the Advisory Action mailed 8/19/03, examiner did not enter the after-final amendment given that it raised new issues which would have required further consideration. Thus, the pending claims remained 63-70 and 73-82 as set forth in applicant's amendment filed 12/3/02.

In a telephonic interview conducted 8/25/03, Ms. Dudek agreed to and authorized the examiner to amend claim 82 to recite:

"An aqueous ink for an ink-jet printing process comprising:

a self-dispersing pigment and a resin encapsulating a coloring material, both of which are dispersed in an aqueous medium, such that the total amount of the solid concentration of the self-dispersing pigment and the resin encapsulating a coloring material is 8 percent by weight based on the total weight of the ink,

the resin encapsulating the coloring material being contained in a sufficient amount to provide rub-resistance to an image produced with the ink,

wherein the ink provides an ink jet recorded image with a certain optical density that is equivalent to that produced with an ink containing the self-dispersing pigment as a sole colorant at the solid concentration of 8 percent, and wherein the encapsulated coloring material is an oil-soluble dye or a water-insoluble pigment."

The examiner agreed that the above amendment to claim 82, support for which is found in the examples of the present specification, would place the present claims in condition for allowance. The examiner agreed to make the necessary changes to claim 82 by an examiner's amendment such amendment agreed to and authorized by Ms. Dudek on 8/25/03.
